

Healthier Care for over 30 years

We understand that to provide the best care you can for your patients, you and your business need to be in good health too.

About Us

At Medtech, we understand you're busy, and there is more to healthcare than just a consultation. Privacy and security are a top priority with associated governing requirements, and healthcare should be easily accessible for everyone. We are here to support your business, patients and the future of healthcare.

Medtech offers a healthcare ecosystem, providing a practice management system hosted in our cloud using state-of-the-art technology that enables health professionals to provide improved care and help patients manage their health and well-being. It is widely recognised for its innovative, leading-edge software solutions and ability to securely share data and enable clinical health information to be available when and where it's most needed.

Medtech draws on its academic, industry, and corporate knowledge to continuously improve healthcare technology to be fit for purpose. Our customers include General Practices (GPs), Hospital Emergency Departments (EDs), Private and Public Hospitals, Specialists, and Government Departments. Three decades of offering digital healthcare solutions and drawing on modern technology enable us to support your company in going to the next level.

Introducing Medtech Artia®

Medtech Artia® is a complete clinical and medical administration application used across Australia by General Practices (GPs), Hospital Emergency Departments (EDs), Private and Public Hospitals, Specialists, and Government Departments. Artia® offers a range of customisable features, can scale to suit your practice size, and has robust security.

Benefits

- ✓ **Advanced design and functionality**
 - Easy to navigate, even if you have no experience using Practice Management Software (PMS)
 - Role-based access controls to ensure the utmost privacy of clinical information to simplify the management and access privileges of staff
 - Create custom reports for accounting, clinical analysis and general practice management tasks, plus funding and claiming purposes that can be exported as a spreadsheet
- ✓ **Customise to suit your practice**
 - Optimise staff productivity through customised, flexible views to suit the reception desk, clinical consultations and accounting staff
 - Build tailored workflows for efficiency and limit administrative work
 - User-defined fields for data input to suit your workflow
 - Customisable document templates

- ✓ **Emergency Department features**
 - Australasian Triage Scale (ATS) Clinical Triage Workflow to prioritise patients according to clinical urgency
 - Integrates with Argus, Medical Objects, Healthlink, hospital systems, eRx, MHR and Real Time Prescription Monitoring (RTPM)
 - Ability to toggle the Triage function on and off depending on the practices need to use this functionality
 - 'FACEM Specialist Service' is available to restrict the invoicing of services that can only be provided by Specialist Providers holding the FACEM qualification

“Medtech offers purpose-built ED modules that work well for PEHA and are user-friendly for doctors, nurses, and administrative staff.”

**Dr Philip Gaudin, Clinical Director,
Private Emergency Health
Australia (PEHA)**

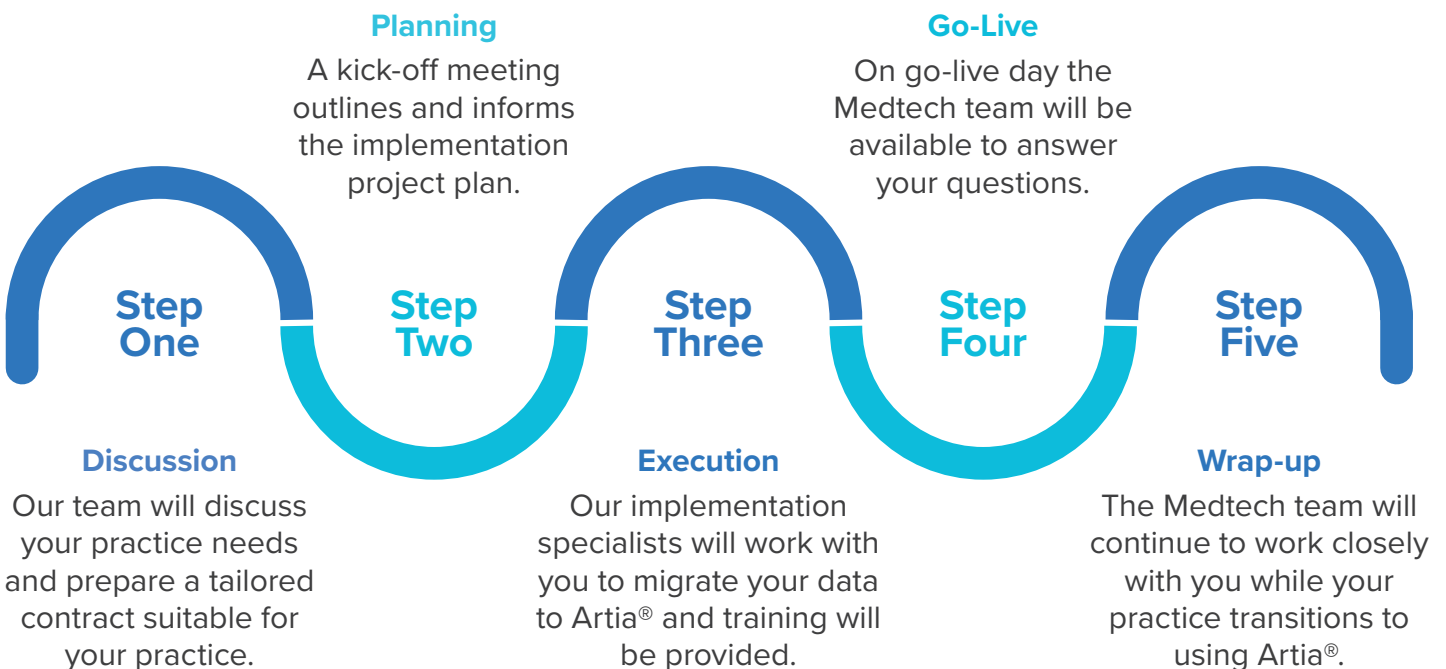

Getting you up and running

We will support your practice through the upgrade to Artia® from a collaborative planning workshop and training right through to “go live”, followed by a formal process to hand your practice over to our Support Team for ongoing support.

If you're upgrading from Medtech Evolution, all your data is migrated, not just your patient health care information and core medical records but all the patient-related information authored by your

practice including financials, invoices and claiming history. All shortcuts and workflows come too so you can get your team up and running quickly.

If you are upgrading from another established PMS system our team have a systematic and well documented approach to bringing your core data across and guiding your practice through the setup process.

Talk to us about choosing Medtech Artia® for your practice.

Secure, flexible and cost effective

With Medtech Cloud, get the immediate benefit of an “always on from anywhere” service. Your data is safe from both equipment disasters and environmental disasters with access anytime from anywhere with an Internet connection, and the added long-term benefits of:

- ✔ Built-in privacy and security to International standards
- ✔ Two-factor authentication for Artia® licence logins
- ✔ Backup and disaster recovery
- ✔ Always-on 4G fail-over, if the Internet is down, mobile takes over
- ✔ Automatic software updates, Medtech does it for you
- ✔ Fixed monthly subscription costs
- ✔ Dynamic scalability, quickly reduce or increase your IT capacity
- ✔ Australia hosted (your data does not leave the country)

“ Moving to the Medtech cloud has been the best thing ever for our practice, it has improved our experience using the software and its great not having to worry about backups and updates anymore.”

**Christine Rogers, Practice Manager
Wellington Medical Centre, Harvey,
Western Australia**
