

Over 75% of general practices choose Medtech

We understand that to provide the best care you can for your patients, you and your business need to be in good health too.

About Us

Medtech has led the market in Practice Management Solutions (PMS) for over 30 years. We work with clinicians to develop healthcare technologies to seamlessly connect the primary care ecosystem.

Medtech is the most connected and flexible product on the market so your practice can choose to operate from any location and choose to host your data on premise or in our Medtech Cloud.

We partner with market-leading experts to build health technology solutions to power general practice and primary care. All Partners connecting to your PMS can only do so with your practice consent and are governed by a Medtech Partner Programme Code of Conduct.

Medtech Medeor®, our fully automated payment solution is specifically designed to treat medical practice accounting pain. Medeor® is integrated with Medtech Evolution, eliminates manual reconciliation and makes it easy for patients to pay.

Today over 75% of general practices in New Zealand use Medtech to deliver high-quality professional services. We are committed to fostering innovation around data sharing and capability for primary care and general practice through health technology.

Our Medtech Ecosystem

We deliver Healthier Care by designing technologies to boost efficiencies, increase accuracy, and create choice so medical practices can put their energy into patient care instead of paperwork.

75% of General Practices choose Medtech

Evolution New Zealand's most established and connected Practice Management Solution.

Data driven healthcare DrInfo monitors patient enrolments, recalls and conditions for more precise and effective interventions.

Medtech AI Your AI intelligence layer

More than a scribe. Integrated with Medtech Evolution. No more copy and paste.

Automate accounting tasks Receive payments from any device, eliminate errors and automate your daily bank reconciliation.

Secure, flexible and cost effective Increase your IT capacity without maintaining or investing in infrastructure.

Get connected with ALEX® Keep your data secure during safe and seamless information exchange with health care services and third-party applications.

Why Choose Evolution

At Medtech, we understand that to provide the best care you can for your patients, you and your business need to be in good health too.

Medtech Evolution is a Practice Management Solution that gives you the familiarity you know and love, with a host of features and benefits no other product can offer. If you're looking for the right PMS solution for your health care organisation, Medtech Evolution gives you choice.

Benefits

- ✓ **Your Third Parties**
Evolution provides a stable and secure platform that allows you to choose your own third parties and connect securely.
- ✓ **Own Your Data**
With Medtech your data belongs to you. If you grow or change your business, you can take it with you.
- ✓ **Your Community**
Whether you're in the middle of a city, in a rural community, Evolution will work for you.
- ✓ **How Your Data is Hosted**
Whether you want your data in our cloud, on our servers, on premise or with your IT partner. You choose.
- ✓ **Future proof your practice**
Medtech Evolution is a Microsoft-based product with all the advantages of one of the world's largest and most recognisable platforms.

“

Thank you to the Evolution support team. Our transition to Evolution was seamless and well supported. We had excellent communication and support prior to, during and after implementation.”

Lauren Demblon, Medical Centre Manager, The Doctors Kerikeri

“

Moving to Medtech Evolution was the best decision we have ever made. Everything is so much easier and much nicer to look at but best of all we have a better workflow. The trainers were wonderful throughout our Go Live and the support afterwards has been amazing. For any clinics still on Medtech32, Evolution is definitely the way to go.”

Denise Rairi, General Admin/Project Lead, Maxcare Medical Centre Ltd

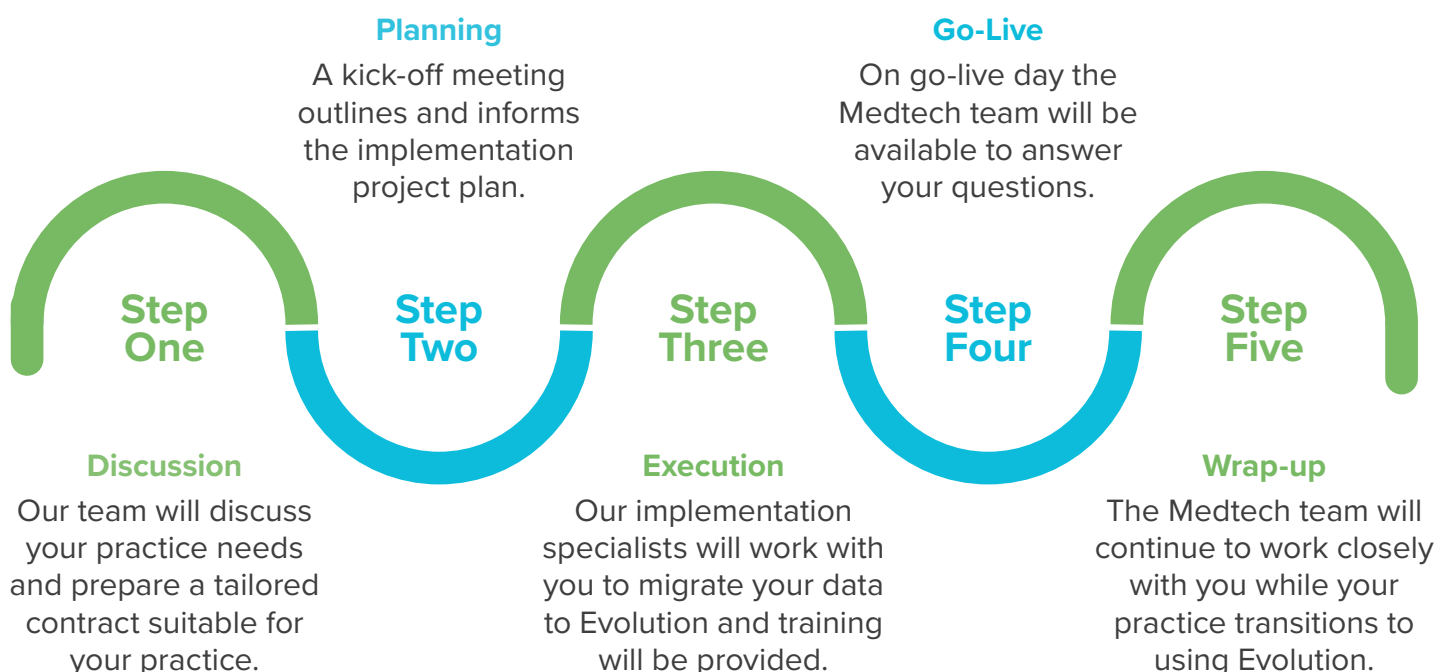

Getting you up and running

We will support your practice through the upgrade to Evolution from a collaborative planning workshop and training right through to “go live”, followed by a formal process to hand your practice over to our Support Team for ongoing support.

If you're upgrading from Medtech32 all your data is migrated, not just your patient health care information and core medical records but all the

patient-related information authored by your practice including financials, invoices and claiming history. All shortcuts and workflows come too so you can get your team up and running quickly.

If you are upgrading from another established PMS system our team have a systematic and well documented approach to bringing your core data across and guiding your practice through the setup process.

Your AI Intelligence Layer

Fully integrated into Medtech Evolution, Medtech AI works as an ambient medical scribe that captures consultations in real time, converts them into structured clinical notes, and presents key information in a central dashboard within your existing workflow

Benefits

- ✓ **Reduce Burnout**
Save six to eight minutes per consultation with streamlined referral letters and structured documentation that reduces after-hours admin.
- ✓ **Clinician in Control**
Every AI-generated note is reviewed and approved by you. Medtech AI supports clinical judgment and maintains accountability.
- ✓ **Complete Patient View**
See latest consultation notes, medications, allergies, immunisations and screenings in one central dashboard.
- ✓ **Better Patient Understanding**
Send clear, health-literacy-adjusted summaries via email to improve recall and follow-through.

- ✓ **Structured Clinical Notes**
Generate structured consultation notes that write directly back into your Medtech Evolution Practice Management Software.
- ✓ **Privacy by Design**
No audio retention. No copying or pasting of patient records. Built for regulated healthcare environments.

“Paperwork is frustrating for most clinicians, spending too much time on documentation, too much time searching for information and not enough time just face to face engaging with the patient.

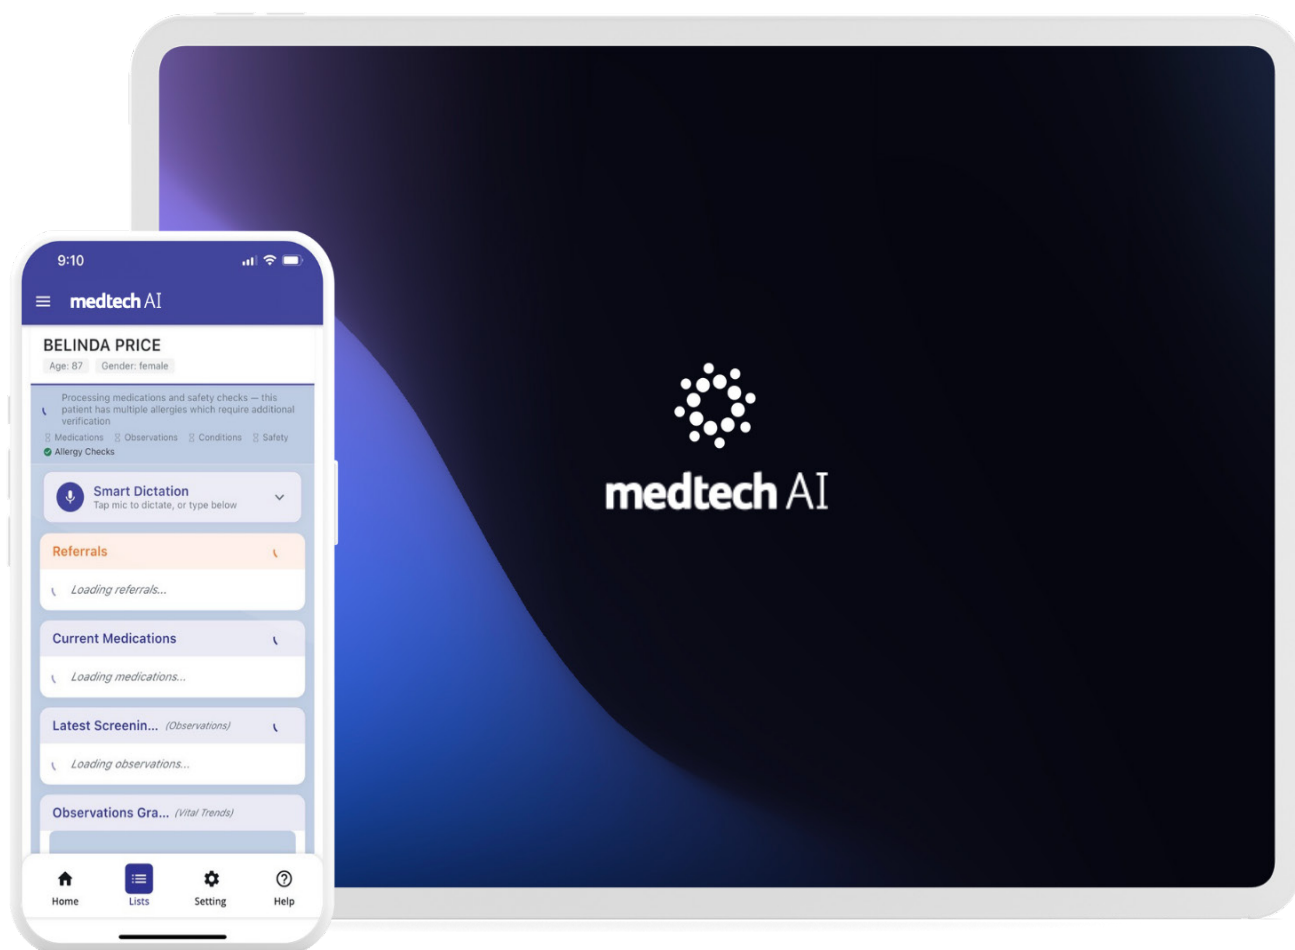

This functionality puts the information you need in front of you while you can get on with consulting.

The new platform generates structured consultation notes, referral letters, and clinical correspondence.”

Dr. Tim Ross, General Practitioner

**More than a scribe. Integrated with Medtech Evolution.
No more copy and paste. Built for New Zealand Healthcare.**

Get Paid with Medeor®

Treat patients instead of triaging your accounts. Medtech Medeor® is fully automated and integrated with Medtech Evolution. Payments are automatically matched against the invoice in Evolution, and payment transactions are automatically matched with bank settlements every day.

Benefits

- ✓ **Get appointments pre-paid**
Take immediate payment for online transactions like appointments, bookings and repeat prescriptions.
- ✓ **Make it easy for patients to pay**
Let your patients pay what they can, or pay for any member of the family from one link.
- ✓ **Say goodbye to spreadsheets**
The daily reconciliation is automated and matches bank settlements against the payment record in Evolution.
- ✓ **Let Medeor® do the admin for you**
All payments are recorded directly in Evolution and all invoices, settlements and bank deposits are presented in a daily reconciliation.
- ✓ **Keep an eye on your bottom line**
Bulk email or SMS aged debtors with a link to pay and customise your message.

Payment methods

Point of Sale (POS)

Medeor® Point of Sale (POS) provides a seamless integration with Evolution, eliminates manual keying errors, automatically allocates payments and gives your practice full visibility of all transactions in real time, in one place.

Pay by Link (PBL)

Simply send a link by email or SMS and all outstanding invoices are presented to your patient on a secure, practice-branded webpage. Patients can pay from any device without the need to create an account or download any apps.

“

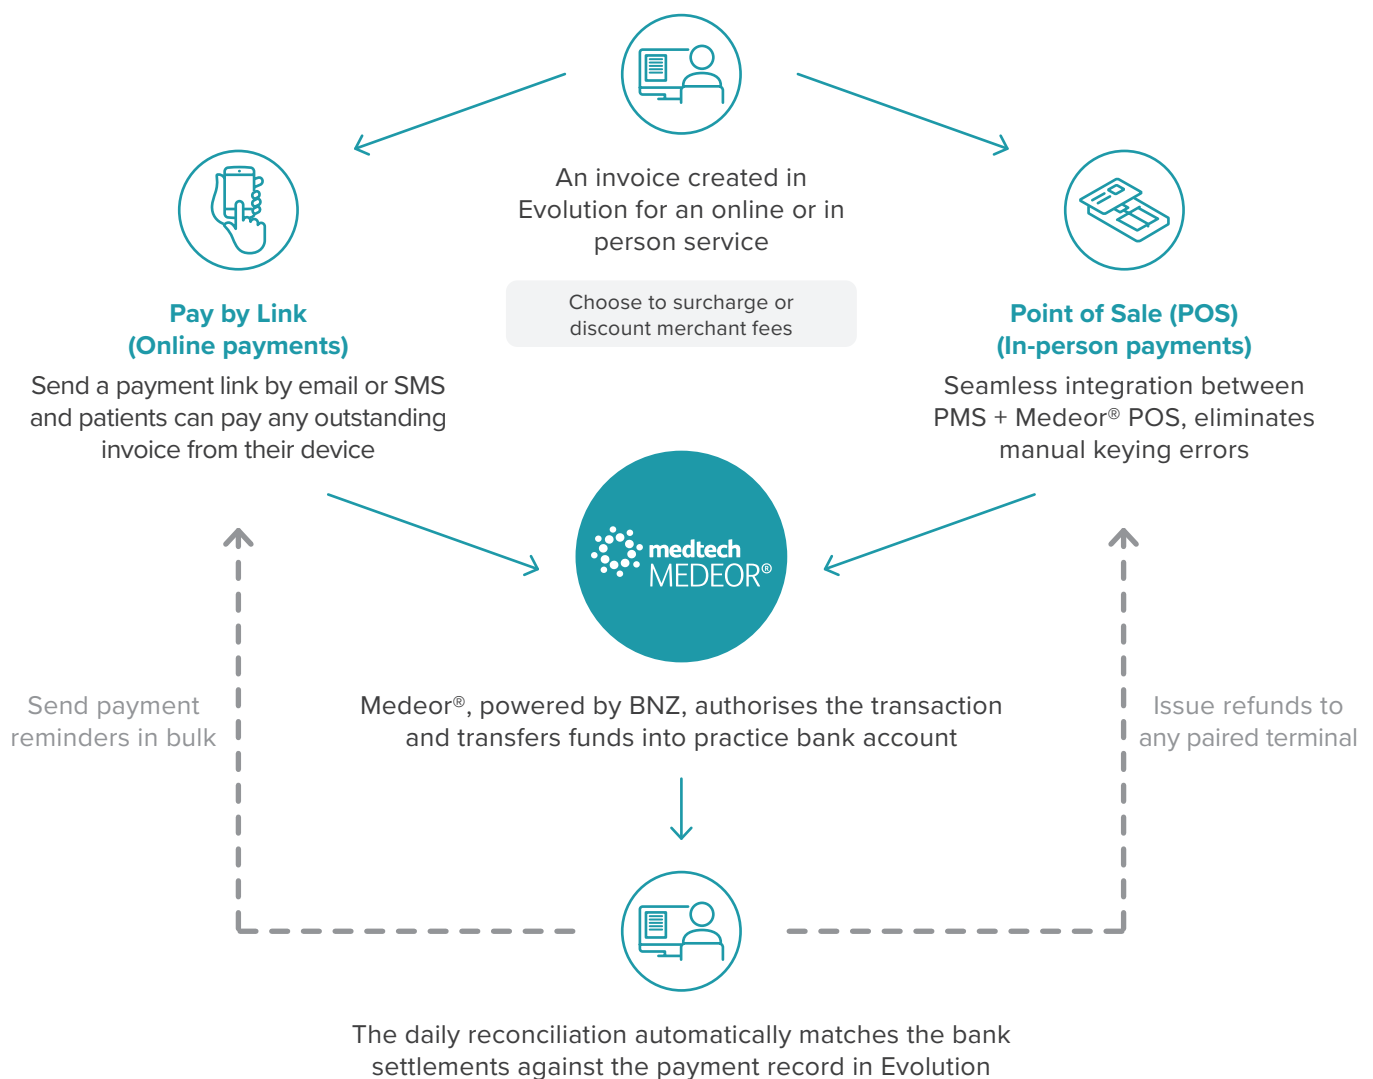

Medeor's automatic and seamless bank reconciliation has reduced the time we're spending on accounts administration. The onboarding process is quick and simple. Medeor has helped our practices streamline our business operations.”

**Jamie Murley, Development Manager,
South Link Health Group**

All your transactions in one integrated, automated payment solution

Secure, flexible and cost effective

With Medtech Cloud, get the immediate benefit of an “always on from anywhere” service. Your data is safe from both equipment disasters and environmental disasters with access anytime from anywhere with an Internet connection, and the added long-term benefits of:

- ✓ Built-in privacy and security to International standards
- ✓ Two-factor authentication for Evolution licence logins
- ✓ Backup and disaster recovery
- ✓ Automatic software updates, Medtech does it for you
- ✓ Fixed monthly subscription costs
- ✓ Dynamic scalability, quickly reduce or increase your IT capacity
- ✓ New Zealand hosted (your data does not leave the country)

Increase your IT capacity without investing in infrastructure

Cloud technology is cutting-edge and designed for interoperability. When you join the Evolution Cloud, you join a digital ecosystem that offers a choice of the latest digital applications and services to save time, cut your practice costs and improve patient care. You own your data, so your practice can scale when you need to, or safely and securely move or merge your data if your business changes or grows. If your practice is looking for the right Practice Management Software, get connected and protected with Medtech Evolution in our Medtech Cloud.

The Medtech Cloud onboarding process was slick, seamless and exceeded all expectations. The team were professional and confident due to their vast experience and the follow up support was outstanding.”

Lisa Hamblin,
Three Rivers Medical

Data driven healthcare

DrInfo boosts workflow efficiency in GP practices by providing proactive, data-driven insights on critical areas such as enrolments, recalls, and condition monitoring.

DrInfo's audit tool looks for patients in your PMS who are due for screenings, preventative care, inoculations, or ongoing monitoring. This ensures practices can easily find patients who need to be seen and ensure they optimise available funding for targeted services.

Benefits

- ✓ **Metrics that reflect reality**
DrInfo's granular metrics capture important insights to inform patient care. For example, data will not only capture a patient's condition, but whether they have been tested for it, whether they're on medication for the condition and whether they are coded for the condition in the PMS.
- ✓ **Improved patient care**
DrInfo automates the data entry and recall processes to improve practice efficiency and free up staff to focus on direct patient care. For example, patient lists can be generated from each metric for bulk recalls via SMS.
- ✓ **Improved practice efficiency**
DrInfo dashboards help practices keep their finger on the pulse of patient and practice financial health by helping them identify funding opportunities for extended patient care and perform better on PHO metrics.

In partnership with DataCraft Analytics

DrInfo is partnered with DataCraft Analytics. While DrInfo is focused on practice-level data, DataCraft Analytics works with PHOs across New Zealand, providing them with the tools and expertise to perform population-level analytics.

This partnership allows for better data integration so that insights from a regional level can be actioned at the practice level, enabling precise and effective interventions.

Get connected with ALEX®

Medtech ALEX® is a core component of Medtech Evolution and a first for general practice. It connects your PMS securely and seamlessly to an ecosystem of digital health care services and third-party applications.

Benefits

- ✓ **Welcome patients without the paperwork**
Our Medtech ALEX® web-based Registration and Enrolment form saves time and helps get patient info right first time.
- ✓ **Controlled access**
ALEX® controls access to your PMS data and ensures only the third parties to which your practice has consented have permission to connect to your PMS.
- ✓ **Information in Real-Time**
With ALEX® the exchange of information is fast, reliable and the connection won't slow your PMS down or break when PMS or application updates are released.
- ✓ **Innovative Applications**
The ALEX® API makes it simple and cost effective for vendors to develop applications that can connect securely to Medtech PMS'.

Our Partners

Care for your patients, care for their data

To ensure data security, data integrity and the reliable performance of our PMS, Medtech requires all healthcare services and third-party applications to connect to your Medtech PMS either through ALEX® or by a method vetted, tested and approved by Medtech.

All Partners connecting to your PMS can only do so with your practice consent and are governed by a Medtech Partner Programme Code of Conduct.
