

# Release Summary

## Medtech 32

Version 22.15 – Build 5914 (October 2018)

This release summary provides an overview of the items included within the Medtech32 Version 22.15 Build 5914 release:

### Compatibility Certifications

Description of Change	Category
Updates to the System Diagnostics module to remove Internet Explorer 7 and 8 options (as these are no longer supported by Microsoft). If you had Internet Explorer 7 or 8 selected, it will now default to Internet Explorer 10.	<b>Compatibility</b>
Installation of a new Idiom Forms Engine for KonnectNet SureMed forms for Internet Explorer 11 compliance.	<b>Compatibility</b>

### Issues Resolved

Description of Change	Category
Fixes an issue where the System Diagnostics module was not displaying IE versions correctly for users that did not have administration rights	<b>Admin</b>
Fixes an issue where the SMS Inbox and SMS Outbox were presenting error messages and crashing when opened with no patient on the palette	<b>Admin</b>
Fixes an issue where in a specific scenario MIMS Drug to Drug Interactions were not displaying all the relevant information to the user	<b>Clinical</b>
Fixes an issue where in a specific scenario multiple of the same MIMS Drug to Drug Interaction Warnings were being displayed	<b>Clinical</b>
Fixes an issue where GP2GP messages from Indici were not importing correctly due to the Consultation Date and Time format	<b>Clinical</b>
Fixes an issue where in a specific scenario the open screens within the Medtech32 desktop were not refreshing correctly when the patient was placed onto the Palette via the Query Builder	<b>Clinical</b>
Fixes an issue where in a specific scenario the open screens within the Medtech32 desktop were not refreshing correctly when the patient was placed onto the Palette due to the Alert prompt going behind the main Medtech32 desktop screen	<b>Clinical</b>
Fixes an issue that could cause duplicate barcodes to be created when using the New Zealand ePrescribing module	<b>Clinical</b>

## Enhancement

Description of Change	Category
Implementation of a warning prompt/alert to the user when the patient on the palette has been changed, but the patient related screens in the application have not been refreshed completely.	<b>Clinical</b>
Implementation of a warning prompt/alert to the user when the patient has not been placed on the palette via the Query Builder due to Medtech32 being minimised.	<b>Clinical</b>
Changes to the View Provider/Patient Inbox screens to disable the file button once clicked and ensure it is only re-enabled once the next message has been completely loaded on screen to avoid instances of double clicking and mistakenly filing a message	<b>Clinical</b>
