## ACC Subsidy Update – 1 December 2018

ACC has advised the following changes that are effective from 1 December 2018:

- 1) Extending zero fee visits for under-14s for GP and Nurse within the Cost of Treatment Regulations (COTR), Urgent Care and Rural General Practice Contracts (previously under 13s);
- 2) Low cost GP and Nurse Co-payments for Community Service Card (CSC) holders and their dependants within the COTR, Urgent Care and Rural General Practice Contracts;
- 3) An inflationary increase of 1.56% will apply to COTR services;
- 4) New services added for Thermoplastic orthotics on the Urgent Care Clinics and Rural Practice contracts (UC83 and RPE3 respectively);
- 5) New service added for SCAT assessment (GPSC), for those GP practices using the primary healthcare clinical pathway for the management of head injuries (concussion/mild traumatic brain injuries) in children and adolescents.

ACC has also clarified the following points in relation to the new Under 14 & CSC Card services introduced that all practices should be aware of:

- 1) In regards to ACC's CSC and Under 14s rates, there is no "Opt in" or "Opt out" status. Practices are entitled to the additional subsidy for CSC regardless of whether they have chosen to "Opt in" or "Opt out" with their PHO for the CSC initiative;
- 2) If a patient under 14 years old holds a CSC or they are a dependant of a CSC holder, then the practice should apply the under 14 rate. This is because under 14s are entitled to fee free visits;
- 3) For juvenile patients from ages 14-17 years, that hold their own CSC, the CSC rates should be applied and if they are a dependant of a CSC holder then the CSC dependant rates should be applied.

Practices are reminded that a **GMS Adjustment should be completed for all service fees that are impacted by the changes in the ACC Subsidies.**

A new GMS Adjustment spreadsheet and 'How to complete a GMS Adjustment in Medtech32' webinar is available in the resources section of the Medtech Website and Insight Customer Portal.
